

## Creating a VoiceThread

Getting Started:

Go to <http://www.voicethread.com>

Click on 'Sign In or Register'

A dark grey button with the text "Sign In or Register" in white, followed by a small downward-pointing triangle icon.

Once you are signed in you will see 3 tabs on the navigation page.

Browse: To review all the VoiceThreads created by others.

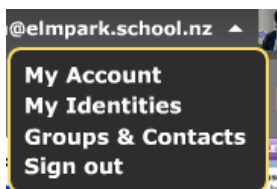

Create: Click on this tab to create a VoiceThread, it will appear on your MyVoice tab.

MyVoice: Click on this tab to view all the VoiceThreads you have made.

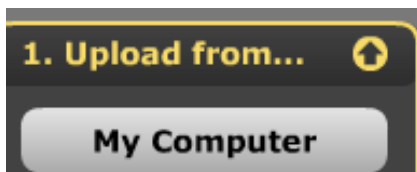

A dark grey button with the text "Browse" in white.A dark grey button with the text "Create" in white.A dark grey button with the text "MyVoice" in white.

Click on your email address and click on My Identities

Add names and images of your students and yourself. Click Done when finished. Now start creating.

Click on the Create tab.

A dark grey button with the text "Create" in white.

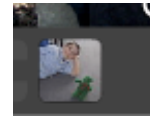

Upload any images/docs or videos you would like. These can be replaced/edited or moved round later.

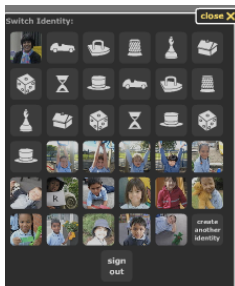

Add a title and description.

A dark grey button with the text "(Add a title and description)" in white.

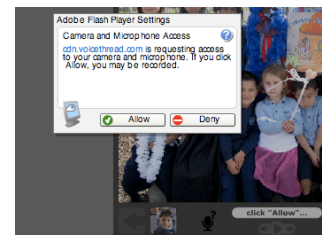

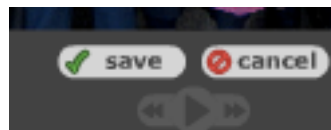

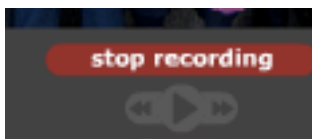

Click on the comment tab.

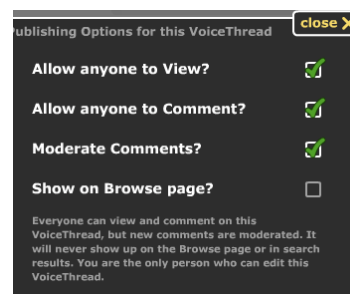

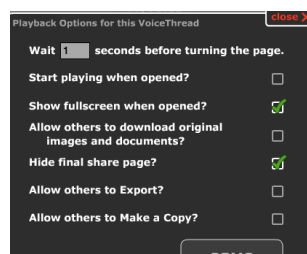

Make sure the identity of the person recording is displayed and so is the image you want to match the comment.

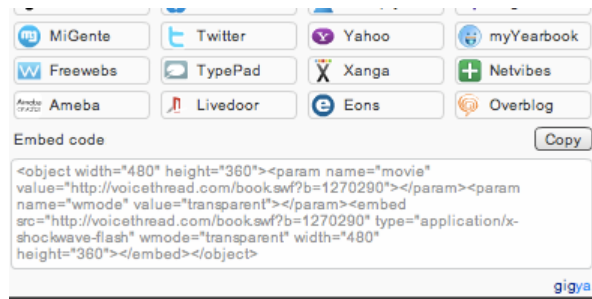

Click on record- allow record and remember to SAVE after listening or checking your comment. Alternatively you may want to type a comment for which you can click on Type.

If you are not happy with the recording, do not save, simply record again. Once this is complete click on the playback options and publishing options to set it to what you want.

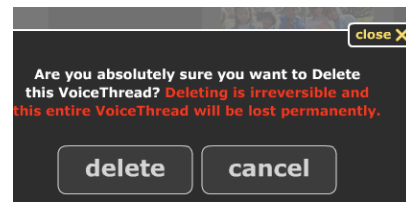

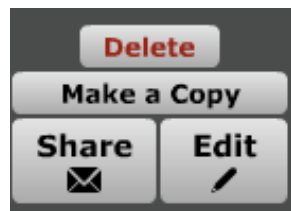

To embed your VoiceThread click on Embed, copy the embed code and paste it where you want it.

You can edit the VoiceThread after completion.

On My Voice tab click on Menu and edit. You can delete VoiceThread you no longer want. Remember if you delete it in VoiceThread it will no longer be available on the internet.

VoiceThread has easy to follow tutorials/ideas if you want to create more advanced ones.
